Major Anomalies

USO — Oil ETF +3.47%

Cause: Oil prices surged due to heightened geopolitical tensions in the Middle East, with Saudi Arabia warning of imminent attacks and ongoing conflict between the US and Iran.

Forward Impact: Expect continued volatility in oil prices as geopolitical risks persist, potentially supporting further upside in USO in the short term.

ETH-USD — Ethereum +2.04%

Cause: Ethereum rallied alongside a broader crypto market uptick, possibly driven by positive sentiment from institutional adoption and technical factors.

Forward Impact: Momentum may continue if market sentiment remains positive, but investors should watch for regulatory news and overall risk appetite.

Hot Now

- **XLK** — Technology shows strong 5d momentum (+5.5%) and positive 1m trend (+2.2%), indicating robust demand.
- **XLY** — Consumer Discretionary has impressive 5d gain (+5.1%) and positive 1m (+2.4%), reflecting consumer strength.
- **XLC** — Communication Services displays solid 5d (+4.3%) and positive 1m (+1.6%), with slight 1d uptick.

Cold but Worth Watching

- **XLU** — Utilities are oversold with 1m -4.4% and 5d -2.9%, but defensive nature may attract bargain hunters.

- **XLRE** — Real Estate has negative 5d (-1.1%) and 1m (+1.5%) but could rebound if rate concerns ease.

Momentum favors growth sectors like tech and consumer discretionary, while defensive sectors like utilities and real estate may offer contrarian opportunities.

Daily Conclusion

Risk-off sentiment is muted but selective, with capital rotating into tech and consumer discretionary while energy and crypto face idiosyncratic pressure amid geopolitical headlines.
