Sector Heat Map

Hot Now

- **Healthcare** — Healthcare shows strong positive returns across 1d, 5d, and 1m, indicating robust momentum.
- **Financials** — Financials have strong 5d and 1m gains despite a slight 1d dip, suggesting sustained upward trend.
- **Utilities** — Utilities have positive 1d and 1m returns, with 5d weakness possibly a pullback in an uptrend.

Cold but Worth Watching

- **Technology** — Technology has negative returns across all timeframes, but oversold conditions may lead to mean reversion.

- **Energy** — Energy has strong 1d and 5d gains but a large 1m loss, potential for reversal if momentum continues.
- **Consumer Discretionary** — Consumer Discretionary is flat to slightly negative, but could rebound if consumer spending improves.

Defensive and value sectors are leading, while growth and cyclical sectors are under pressure, suggesting a risk-off rotation.

Daily Conclusion

Risk-off rotation dominates as geopolitical uncertainty from the Iran deal collapse drives capital out of Technology and Energy into defensive sectors like Healthcare, Utilities, and Financials.
