Major Anomalies

ETH-USD — Ethereum [▲]+4.08%

Cause: Crypto rally fueled by broader risk-on sentiment and positive tech/AI news, with Ethereum benefiting from network upgrades.

Forward Impact: Ethereum may continue to rise if risk appetite persists, but regulatory news could cause sharp reversals.

XLK — Technology ETF +3.78%

Cause: Tech sector surge led by AI and semiconductor demand, with Databricks' growth reinforcing positive sentiment.

Forward Impact: Sector likely to remain volatile as AI hype meets margin compression concerns.

SLV — Silver ETF +3.56%

Cause: Silver rallied alongside gold on safe-haven buying and industrial demand optimism from AI and tech growth.

Forward Impact: Silver could outperform gold if industrial demand strengthens, but remains sensitive to economic data.

USO — Oil ETF -3.36%

Cause: Oil prices fell on reports of a potential Iran deal that could increase global supply and ease sanctions.

Forward Impact: Further downside possible if the deal progresses, but OPEC+ actions may limit losses.

QQQ — Nasdaq 100 ETF +3.14%

Cause: Broad tech rally driven by strong AI-related earnings and optimism from Databricks' 80% sales growth.

Forward Impact: Momentum may continue if AI sector earnings sustain, but valuation risks could trigger profit-taking.

GLD — Gold ETF +2.59%

Cause: Safe-haven demand increased amid geopolitical uncertainty from the Iran deal and potential congressional scrutiny.

Forward Impact: Gold may stay elevated if geopolitical tensions persist, but a deal could reduce safe-haven flows.

Energy	-3.5%	-4.8%	-4.3%

Hot Now

- **Technology** — Strong positive returns across 1d, 5d, and 1m, indicating robust momentum.
- **Materials** — Exceptional 5d performance of +5.1% and positive 1m return, suggesting cyclical strength.

Cold but Worth Watching

- **Energy** — Sharp declines across all timeframes, but potential for mean-reversion given oversold conditions.
- **Communication Services** — Negative 1m return of -4.2% with recent stabilization, possible turnaround if sentiment shifts.

Technology and Materials lead with strong momentum, while Energy and Communication Services are oversold and may rebound.

Daily Conclusion

The dominant macro theme is a risk-on rotation driven by a geopolitical breakthrough, as a US-Iran deal fuels a record rally in equities and a sharp decline in oil prices, boosting Technology and Materials while pressuring Energy and Communication Services.
