⚠️ Major Anomalies

SLV — Silver ETF `+3.39%`

Cause: Silver rallied on safe-haven demand amid escalating Middle East tensions, including missile strikes on Aden airport and attacks in the West Bank.

Forward Impact: Continued geopolitical instability could keep silver supported, though a de-escalation or stronger dollar would cap gains.

USO — Oil ETF `+2.44%`

Cause: Oil rose as Middle East supply risks intensified and the US solicited exchanges of up to 17 million barrels from the Strategic Petroleum Reserve, signaling tightness.

Forward Impact: Oil may stay elevated if tensions persist, but SPR releases and demand concerns could limit upside.
