⚠️ Major Anomalies

UNG — Natural Gas ETF `+7.81%`

Cause: Natural gas spiked on supply concerns tied to the Iran South Pars platform fire and related geopolitical risk, tightening the near-term supply outlook.

Forward Impact: Gas is highly volatile; if the fire remains contained and supply normalizes, the spike could fade, but any escalation would sustain upward pressure.

USO — Oil ETF `-3.87%`

Cause: Oil fell as the contained Iran South Pars gas platform fire eased supply-disruption fears, removing a geopolitical risk premium.

Forward Impact: Crude remains headline-driven; any escalation in Iran/Middle East or OPEC+ supply decisions could quickly reverse the decline.

XLK — Technology ETF `+3.73%`

Cause: Technology led the rally as investors rotated back into growth names, with the sector benefiting from dip-buying after recent weakness.

Forward Impact: Tech leadership hinges on AI capex momentum and rate path; hot inflation data remains the key risk to further multiple expansion.

QQQ — Nasdaq 100 ETF `+3.54%`

Cause: Nasdaq 100 outperformed as technology and growth stocks led the rebound, with XLK strength confirming a tech-driven risk-on move.

Forward Impact: Growth remains sensitive to rate expectations; sustained gains depend on inflation cooling, otherwise higher yields could pressure multiples.

IWM — Russell 2000 ETF `+3.23%`

Cause: Small caps surged on improved risk sentiment and hopes that rate worries may ease, with Russell 2000 beta amplifying the broad market move.

Forward Impact: Small caps are highly rate-sensitive; a hawkish Fed or sticky inflation could reverse this move quickly given refinancing and credit concerns.

SLV — Silver ETF `+2.71%`

Cause: Silver jumped on safe-haven and industrial demand, supported by a weaker dollar/risk-on metals complex and geopolitical tensions from Iran headlines.

Forward Impact: Silver can extend gains if geopolitical risk persists and industrial demand holds, but a stronger dollar or hawkish Fed could cap upside.

SPY — S&P 500 ETF `+2.37%`

Cause: Broad US equities rallied as risk appetite returned, with the headline mix (contained Iran gas fire, no escalation) and a tech-led rebound lifting the whole market despite hot inflation data and hawkish Fed comments.

Forward Impact: Watch whether the rally holds if inflation/Fed rate worries persist; a hot CPI print could cap further upside and raise volatility.

DIA — Dow Jones ETF `+2.17%`

Cause: Dow participated in the broad equity rally but lagged as its cyclical/value tilt benefited less from the tech-led surge.

Forward Impact: Relative underperformance likely continues while tech leads; rotation back to cyclicals would require softer inflation or stronger economic data.

🔥 Sector Heat Map

Hot Now

- **Healthcare** — XLV leads with +10.3% 1m and steady gains across 1d/5d/1m, showing defensive growth leadership
- **Consumer Staples** — XLP posts +8.9% 1m with positive 1d/5d/1m, a classic risk-off defensive bid
- **Real Estate** — XLRE is accelerating with +2.3% 5d and +7.3% 1m, benefiting from rate-cut expectations
- **Consumer Discretionary** — XLY shows strong short-term thrust (+2.9% 1d, +2.4% 5d) and solid +7.2% 1m despite consumer concerns

Cold but Worth Watching

- **Technology** — XLK is deeply oversold at -14.0% 1m but bounced +3.7% 1d, a potential mean-reversion candidate if the bounce holds
- **Energy** — XLE is the worst 5d performer at -7.9% and -4.8% 1m, deeply washed out with contrarian value if oil stabilizes
- **Communication Services** — XLC has a strong +7.1% 5d rebound off a -2.7% 1m base, suggesting early rotation back into the laggard
- **Industrials** — XLI is flat-to-negative 1m (-0.2%) but posted the strongest 1d (+3.8%), hinting at a possible inflection

> Defensive and rate-sensitive sectors (healthcare, staples, real estate) are leading while high-beta tech and energy are oversold, signaling a rotation toward safety with early mean-reversion nibbles in beaten-down growth.

💡 Daily Conclusion

> Hot inflation data and hawkish Fed comments drove broad equity sell-offs and rate worries, with investors rotating out of technology and energy into defensive sectors.
