Major Anomalies

USO — Oil ETF -4.36%

Cause: Oil dropped sharply on the US-Iran ceasefire agreement, which eased supply disruption fears, and on the US inflation data raising demand concerns.

Forward Impact: Oil prices could stay volatile as the market weighs ceasefire durability against potential supply disruptions from sanctions on Iran.

SLV — Silver ETF -3.18%

Cause: Silver fell as the US-Iran ceasefire deal reduced safe-haven demand, while a stronger dollar and higher real yields pressured precious metals.

Forward Impact: Silver may remain under pressure if geopolitical tensions ease further and the dollar stays strong, but inflation concerns could provide support.

UNG — Natural Gas ETF +2.47%

Cause: Natural gas rose on colder weather forecasts and supply concerns, despite the broader commodity selloff from the Iran ceasefire.

Forward Impact: Natural gas may continue to be driven by weather and storage data, with limited correlation to geopolitical events.

ETH-USD — Ethereum -2.35%

Cause: Ethereum fell alongside risk assets as the US inflation data raised fears of tighter monetary policy, outweighing the positive ceasefire news.

Forward Impact: Ethereum could face headwinds from rising interest rates and regulatory uncertainty, but the ceasefire may improve risk appetite.

Hot Now

- **Technology** — Strong 1m and 5d momentum, leading the market
- **Consumer Discretionary** — Sharp 1d and 5d gains, consumer confidence high
- **Industrials** — Solid 5d and 1m performance, cyclical recovery

Cold but Worth Watching

- **Energy** — Sharp 5d decline, but 1m still positive; potential bounce
- **Financials** — Negative 1m, but 5d slightly positive; rate sensitivity
- **Utilities** — Negative 1m, defensive rotation may reverse

Growth and cyclical sectors dominate as market rallies, while defensive and rate-sensitive sectors lag, suggesting risk-on sentiment.

Daily Conclusion

Rising inflation and mixed commodity signals are driving a rotation into growth sectors like Technology and Consumer Discretionary, while Energy and Financials lag.
