Major Anomalies

USO — Oil ETF -2.64%

Cause: Oil prices fell on expectations of increased supply as Strait of Hormuz traffic may normalize by August, easing geopolitical risks.

Forward Impact: If supply concerns continue to fade, oil prices may face further downward pressure, but OPEC+ actions could limit losses.

ETH-USD — Ethereum +2.64%

Cause: Ethereum rallied alongside Bitcoin, driven by overall crypto market optimism and positive macro sentiment.

Forward Impact: Ethereum may benefit from its growing use in DeFi and upcoming upgrades, but volatility persists.

BTC-USD — Bitcoin +2.00%

Cause: Bitcoin rose amid positive market sentiment from bullish headlines and expectations of lower oil prices benefiting risk assets.

Forward Impact: Continued bullish sentiment and potential Fed rate cuts could support further gains, but regulatory risks remain.

Communication Services	-0.4%	-0.0%	-4.4%

Hot Now

- **Materials** — Strong 1d, 5d, and 1m momentum; top performer across timeframes
- **Financials** — Consistent positive returns across all periods; solid 1m gain
- **Technology** — Strong 5d and 1m performance; tech leadership continues

Cold but Worth Watching

- **Communication Services** — Sharp 1m decline; potential mean-reversion if sentiment shifts
- **Consumer Discretionary** — Negative 1m return despite positive short-term; oversold bounce possible

- **Energy** — Negative 1m and 5d; energy may rebound on supply concerns

Cyclical and value sectors lead with strong momentum, while lagging sectors like communication services and consumer discretionary may offer mean-reversion opportunities.

Daily Conclusion

Risk-on rotation accelerates as a geopolitical ceasefire crashes oil prices, fueling rallies in Materials, Financials, and Technology while pressuring Energy and Consumer Discretionary.
