Major Anomalies

USO — Oil ETF +5.46%

Cause: Oil surged as US-Iran strikes raised fears of supply disruptions in the Middle East, a key oil-producing region.

Forward Impact: Oil prices may stay elevated if tensions escalate, but potential diplomatic efforts or increased supply from other producers could limit upside.

SLV — Silver ETF -3.68%

Cause: Silver fell more than gold due to its higher industrial demand sensitivity and profit-taking after recent gains.

Forward Impact: Silver's outlook hinges on industrial demand and risk sentiment; a rebound in global growth could support prices, but further equity strength may weigh.

GLD — Gold ETF -2.86%

Cause: Safe-haven demand waned as Wall Street ended higher and stocks reclaimed some shine, reducing gold's appeal.

Forward Impact: Gold may face further pressure if risk appetite continues to improve, but geopolitical tensions could revive safe-haven buying.
