Hot Now

- **Healthcare** — Strong positive returns across 1d, 5d, and 1m, indicating robust momentum.
- **Utilities** — Consistent gains with positive 1d and 5d, and solid 1m performance, suggesting defensive rotation.
- **Real Estate** — Positive across all timeframes, benefiting from lower interest rate expectations.

Cold but Worth Watching

- **Technology** — Sharp declines over 5d and 1m, but potential for mean-reversion given high beta and oversold conditions.
- **Consumer Discretionary** — Negative 5d and 1m, but consumer spending may rebound if economic data improves.
- **Communication Services** — Worst 1m performer, but could bounce if growth fears ease.

Defensive sectors like healthcare and utilities are leading amid growth concerns, while beaten-down tech and consumer discretionary may offer contrarian opportunities.

Daily Conclusion

Defensive rotation dominates as investors seek safety in Healthcare, Utilities, and Real Estate amid geopolitical uncertainty from US-Iran talks, while shunning risk-sensitive Technology and Consumer sectors.
